

David Ugwuegbulam

Fullstack Software Engineer

Lagos, Nigeria | +234-708-110-1605 | davidtobe1999@gmail.com | github.com/davidtobe13 | david-tobe-portfolio.vercel.app

PROFESSIONAL SUMMARY

Fullstack Software Engineer with 4+ years of experience (since 2022) designing, building, and maintaining scalable web and mobile applications end-to-end. Proficient across the stack with Node.js, Express.js, TypeScript, PostgreSQL, and MongoDB on the backend, and React.js, Next.js, and React Native on the frontend. Delivered production fintech systems including cross-border payment platforms and a multi-chain stablecoin (USDT/USDC) payment integration spanning Solana, Base, and Ethereum. Skilled in REST API design, authentication and authorization, database optimization, containerization with Docker, and third-party/blockchain API integrations.

CORE SKILLS

Languages: JavaScript (ES6+), TypeScript

Backend: Node.js, Express.js, REST API Design, Authentication & Authorization, Microservices, Socket.io

Frontend: React.js, Next.js, React Native, Redux, React Query, Tailwind CSS

Databases: PostgreSQL, MongoDB

Blockchain / Fintech: Stablecoin Integration (USDT, USDC), Multi-chain (Solana, Base, Ethereum), Cross-border Payments, Third-party API Integration

Tools & Practices: Docker, Git/GitHub, Agile, Testing & Debugging, Cloudinary, CI/CD Fundamentals

PROFESSIONAL EXPERIENCE

Frontend Engineer — Geodex (OOH Advertising Platform)

2025 – 2026

Subscription-based Out-of-Home advertising platform used by agencies and brands to plan, track, and optimize billboard campaigns.

- Developed modern, responsive user interfaces using React.js, Next.js, TypeScript, and Tailwind CSS.
- Built dashboard screens for campaign management, billboard selection, analytics, performance insights, and client reporting.
- Implemented reusable component structures and optimized UI rendering for large datasets (billboards, campaign metrics).
- Integrated REST APIs for campaign creation, payments, user authentication, analytics, and geolocation features.
- Developed interactive map-based UI components for viewing billboard positions and details.
- Collaborated with UI/UX designers and backend engineers to deliver seamless user workflows and ensure cross-browser compatibility.

Fullstack Engineer — Monirates

2024 – 2025

Cross-border payments platform.

- Developed backend services and RESTful APIs with Node.js and TypeScript, and built responsive UIs with React.js and Tailwind CSS, to power cross-border payment solutions.
- Built a multi-chain stablecoin payment feature enabling users to send and receive USDT and USDC across Solana, Base, and Ethereum, integrating with a third-party blockchain payment provider.
- Enhanced React Native mobile applications for Android and iOS, improving user access to financial and crypto services.
- Integrated and optimized MongoDB and PostgreSQL databases for secure, efficient financial data management.
- Implemented authentication, authorization, and transaction security measures aligned with fintech compliance standards.

- Collaborated with frontend, mobile, and backend teams to ensure reliable data flow and seamless API integration.
- Conducted testing, debugging, and performance optimization to ensure system reliability and scalability.

Fullstack Engineer — Scupay

2023 – 2024

- Developed and maintained backend services and APIs (Node.js, Express.js, PostgreSQL, MongoDB) alongside responsive frontend interfaces (React.js, Next.js, Tailwind CSS).
- Built responsive UI screens and reusable components, improving UI consistency and performance.
- Collaborated with engineering and design teams to design and implement scalable, secure, and efficient full-stack solutions.
- Integrated REST APIs and ensured smooth client-side and server-side interactions across all devices.
- Conducted testing, debugging, and performance optimization to ensure reliability and responsiveness.

Fullstack Intern — Clubbera

2022 – 2024

- Assisted in development and maintenance of server-side applications, APIs, and databases, as well as frontend features and interactive UI components using Next.js, TypeScript, and Tailwind CSS.
- Collaborated with the development team to design and implement scalable full-stack solutions.
- Worked with React.js to enhance dashboards and client-facing pages; supported API integration and testing.
- Gained hands-on experience with Node.js, PostgreSQL, and Express.js.
- Used Git for version control and collaborated within an Agile development workflow.

PERSONAL PROJECTS

TwoPay — Web App, 2024

Secure banking web application enabling users to perform financial transactions, manage accounts, and access banking features online.

Tech: Node.js, Express.js, MongoDB, React.js, Cloudinary | github.com/davidtobe13/twoPay-bankApp

SwiftLaundry — Web App, 2024

Web application connecting users with nearby laundry shops for scheduling, pickup, delivery, and real-time order updates.

Tech: Node.js, Express.js, MongoDB, React.js, Cloudinary | github.com/davidtobe13/swift_laundry

EDUCATION & CERTIFICATIONS

Backend Engineer Trainee — The Curve Africa (by KORA) — Cohort 3 (2023)

- Best Graduating Student
- Overall Best Graduating Student

ND, Computer Science — Federal Polytechnic Nekede (2019)
